Reasons for referral

This application seeks consent development on land, or within 40m of land, containing:

- All Development Applications on
- Actual or potential threatened species, populations, ecological communities, or their habitats;
- Wildlife corridors;
- Vegetation query stipulating that a Flora and Fauna Assessment is required;
- Vegetation query - X type located in both A & C Wards;

And as such, Council's Natural Environment Unit officers are required to consider the likely potential environmental impacts.

Officer comments

Original Comments

Council's Biodiversity Referrals team have assessed the Development Application for compliance against the following applicable provisions:

- Pittwater 21 DCP cl. B4.5 Landscape and Flora and Fauna Enhancement Category 3 Land

An Arboricultural Impact Assessment (Redgum Horticultural, July 2024) was prepared and submitted as part of the application. The Arborist recommends the removal of all trees assessed on the subject lot, including 1 native prescribed tree (Tree 2 *Casuarina glauca*) and 6 exempt species (Tree 1 Norfolk Island Pine and Trees 3-7 Cocos Palm). The removal of all canopy trees within the subject lot does not comply with P21 DCP cl. B4.5 which requires that development shall result in no significant onsite loss of canopy cover or a net loss in native canopy trees. It is recommended that the development be redesigned to ensure retention of Tree 1 and Tree 2 which provide habitat for native fauna. Furthermore, the submitted Landscape Plan (Canvas Landscape Architects, July 2024) does not provide adequate native replacements for canopy tree removal, which should reflect similar sized native replacements to that being removed, such as tall locally native Eucalypt species.

Additional Comments

Amended documentation has been submitted including amended Master Plan and Landscape Plan, confirming the retention of Tree 1 and Tree 2. Subject to the retention of these trees, there are no objections in relation to biodiversity matters. Conditions will be applied accordingly.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

Recommended Natural Environment Conditions:

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

No Clearing of Vegetation

Unless otherwise exempt, no vegetation is to be cleared prior to issue of a Construction Certificate.

Details demonstrating compliance are to be submitted to the Certifier prior to issue of Construction Certificate.

Reason: To protect native vegetation.

CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

Wildlife Protection

If construction activity associated with this development results in injury or displacement of a native mammal, bird, reptile or amphibian, a licensed wildlife rescue and rehabilitation organisation must be

contacted for advice.

Reason: To protect native wildlife.

Protection of Habitat Features

All natural landscape features, including any rock outcrops, native vegetation and/or watercourses, are to remain undisturbed during the construction works, except where affected by necessary works detailed on approved plans.

Reason: To protect wildlife habitat.

**CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE
OCCUPATION CERTIFICATE**

Protection of Habitat Features

All natural landscape features, including any rock outcrops, native vegetation and/or watercourses, are to remain undisturbed except where affected by necessary works detailed on approved plans.

Details demonstrating compliance are to be provided to the Principal Certifier prior to issue of any Occupation Certificate.

Reason: To protect wildlife habitat.

No Weeds Imported On To The Site

No Priority or environmental weeds (as specified in the Northern Beaches Local Weed Management Plan) are to be imported on to the site prior to or during construction works.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to issue of any Occupation Certificate.

Reason: To reduce the risk of site works contributing to spread of Priority and environmental weeds.
