And as such, Council's Parks, Reserves and Foreshores officers are required to consider the likely impacts of the proposal.

Officer comments

The development site adjoins Sandy Beach Reserve that is located downslope of the property. All development works must ensure that surface sediment runoff and/or erosion is controlled, managed and contained within the site boundaries and prevented from travelling across the boundary and into the Reserve.

No physical encroachments over the site boundaries are permitted, and structures and built elements are not permitted beyond the site boundaries. As noted in the Landscape Plan a planted buffer is proposed between the pool and the rear boundary adjoining the public Reserve and furthermore the pool and surrounds is at natural ground level and thus the development is not detrimental to the prevailing landscape character when viewed from the adjoining Reserve and also the Pittwater waterway.

Public access to the Reserve and Pittwater waterway is not impacted by the proposed development.

Parks, Reserves and Foreshores Referral raise no concerns with the development proposal.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.
