Application Number: REV2022/0024 Description:Section 8.2(1A) Review of

Subject: Determination - Review of Determination of Application DA2021/2173 for alterations and additions and coastal protection works to Newport Surf Life Saving Club

Good afternoon

I would like to make a submission in favor of the Newport SC development application currently under review.

Although we are not members of the club we support the necessary works required to bring the surf club to a much improved standard expected from a safety, useability and aesthetic perspective. Having experienced the complete rebuild of Mona Vale, it would be expected that any building improvements for Newport should include:

similar renovations for updating the clubhouse for both surf rescue and training,

A pleasant bar area for members and public, and

Appropriate coastal protection works.

One other improvement to consider should be an increase in seating and shading for visitors and the wider community to the beach front. Steps to the beach incorporated into any coastal protection works could help with seating as well as shaded landscaped areas to the south of the existing club similar to the wooden seating areas on dee why beachfront. The 'green' as it is, is pretty unusable in summer due to the lack of shade and seating.

I support the DA in its entirety and hope that the final decision provides members, the club and the wider community with a first class surf club and training facility integrated with the existing historic building.

Yours faithfully
Shauna Willis
