Subject: Submission re DA2022/0145

The proposed Pittwater road development on the northern border of Stony Range Regional Botanical Garden should not be permitted . The proposed 8 storey development will damage the Garden by blocking sunshine and light to the plants and trees and make the public picnic and BBQ area unusable for most of the year.

Stony Range is a very important environmental resource for the Northern Beaches, particularly the highly developed Dee Why area.

I request that the DA 2022/0145 be refused and the developers resubmit a plan which does not have a negative impact on Stony Range Botanical Garden.

Kind regards

Diane Brook
