RE: REV2021/0006 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

It is with Strong Objections that I write this submission.
The effects of excavation and biodiversity destruction in a sensitive riparian zone will be catastrophic for Curl Curl Creek -which sits below the site. This is the main feeder creek to Manly Dam and home to the very last population of Climbing Galaxias Fish in Sydney. Of course the environmental health of Manly Dam is vital for human recreation too.
