**RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085**

This development is far too big for the area to handle. Glen street is already too busy with the shopping center, library, theatre and sports fields plus dog walking and playgrounds. The infrastructure we have cannot cope with the traffic and parking now let alone with a development such as this right on the corner. It would be pathetic to think the building would cater for all parking within itself so the surrounding streets will undoubtedly pay the price. Also the increased traffic during rush hour in the mornings and afternoons to get onto forestway then warringah road would be awful. It already takes me so long to get onto forestway at 7am due to traffic from Davidson, Frenchs forest and belrose all having to get out that this ridiculous increase in the number of cars from one building would be ridiculous. This position is just not sensible to house a building of this size.
