RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

Please consider the detrimental impact that this development WILL have on the Manly Dam War Memorial natural area. We are blessed to have this beautiful bushland and the native species within it. There are many endangered animals that live within this area and any work carried out will cause an environmental disturbance which it may not recover from. We have a rare fish living in the dam which with run off from any work done upstream could be wiped out. We already lost valuable land when the Manly Vale school was built, we need to keep this area of original natural bush pristine for years to come.

Thank you
