RE: DA2019/1173 - 3 Berith Street WHEELER HEIGHTS NSW 2097

It will have a huge impact on the streetscape of Berith which is residential with large blocks with long setback houses from street.

This DA includes a large boxy 2 storey building covering the whole block.

The buildings will impact on neighbouring properties' sun and privacy, as well as cause damage from the excavation of over 4 meters in solid rock close to neighbours' boundaries.

We are very concerned and have no confidence in the developer to handle removal of the asbestos, on and in the house and shed, safely - danger to neighbourhood and in particular the children at the adjoining primary school. With 3 young children this is a significant concern!
