RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

I have correspondence from
Dr J McAnulty, Executive Director, Health Protection NSW and
CHRISTER TÖRNEVIK Senior Expert, EMF and Health Ericsson Research Sweden

stating that 50m is the safe distance from a mobile telephone tower emitting EMF radiation .

Given the proposed tower is about 25m high and the safe distance from the top of the tower to ground level is 50m the safe distance at ground level from the tower base is 43.3m.

This means that the safe circumference around the tower is 138m covering an area of 1540 sq m

What action is planned to ensure the public is excluded from the unsafe zone.

Regards
David England
