RE: DA2020/1351 - 1 Bilambee Lane BILGOLA PLATEAU NSW 2107

The scale of the development is grossly out of keeping with the area, and the traffic the proposed development would bring to a corner that already has 3 access points on to it would be very dangerous. Many young children are walking to school (some unaccompanied) across the junction as well as toddlers passing and negotiating this junction with parents to the local Billy Kids nursery It's not a sensible junction to be increasing scale and traffic dramatically at. Plenty of apartments at the bottom on the Plateau. It's not a community that has enough services to accommodate volumes of people in apartment style living. Bus routes are being cancelled in the area, again bringing more people in to cars on the roads. Why would anyone be suggesting it's a suitable place for apartment living?
