**RE: DA2021/0744 - 50 Lawrence Street FRESHWATER NSW 2096**

There appears to be no need for a construction traffic management plan given this is located on an intersection of Dowling, Lawrence and Oliver Streets is a little hard to fathom.

Does this mean we will have to tolerate double bogie tippers trying to reverse in narrow side streets.

If they could be held to single loads this would alleviate trucks waiting in narrow side streets, especially considering there is City bound bus that travels this intersection excessively in the mornings, along with one that does travel up and down Dowling street.
