

29 August 2019

To whom it may concern,

~~Please find attached an application for Modification to DA2019/0681~~

In discussions with Adam Urbancic today I was advised to lodge this modification request in relation to point 7 on our notice of determination. This should not be in the DA consent as it is part of the already approved CDC. A discussion was had by Adam with an environmental officer who confirmed that this point was probably included in error and that this was the best way forward provided some explanation was supplied.

In response to David Austers Environmental Health Referral Response I would like to clarify the following:

- 1) That we do not intend to replace or modify the existing ventilation system in any way
- ~~2) That we do not use charcoal as a method of cooking~~

It is important to note that his response has assumed that there will be no changes to the current ventilation system, his assumption would be correct.

As a result we ask that this condition be modified/deleted for the reasons mentioned above.

Thank you
