Subject: I object strongly to this DA2020/0661 Telco tower in Park

26 August 2020.

Stephen Brickwood

25 Blackwood Road,

North Curl Curl, NSW. 2099

Dear Council.

in addition to my previous submission.

I object strongly to this DA2020/0661

Re: Report - Visual Impact Assessment Report

This report limits itself to one installation and ignores all the other co locating telcos.

The council has no control over the co locators to follow, it has no legal rights if one telco builds.

Therefore, the council cannot approve even one telco.

The community objected strongly when the simple light towers were built and, to add insult to injury, without due process.

The other telcos, are a fact of life and, would have an absolute legal right to this tower and the installations of their own BASE STATIONS with their own razor wire compounds. The council would have no control.

The foot print of all these additional compounds will be huge.

The height of the tower will increase with each telcos new antennas.

This report fails to show the real world impact of this 'gross' proposed DA.

This report is deceptive in this larger matter.

This report fails to show the real world impact on the community of this proposal when they are in the park enjoying its environment and playing on the fields or walking or picnicking or etc..... and new by or within 100s of meters of this proposal.

This report is to assist the council and is the product of a professional expert, and yet the full impact has not been provided.
