RE: DA2019/1414 - 51 Redman Road DEE WHY NSW 2099

In regards to this application I am concerned about the placement, size and noise of the proposed workshop. I would be directly impacted by the workshop as its placement is directly in front of my unit balcony and covers my entire outlook. I now have an open view which would be completely taken away. As this structure is to be used as a workshop and in such close proximity I am worried about noise created by working on cars.

I feel that the size of this workshop is too large for the property considering there is already 2 other buildings proposed. I would like to request a height pole so I can see how high this building is and impact on my view. I appreciate that there will be a hedge but it may take years to be of a height to cover the workshop and will not solve my concerns.

I am also saddened by the massive loss of trees from this property which provide a haven for local birds and other wildlife.
