

	DRAINAGE DESIGN CALCULATIONS: Council: Warringah - Northern Beaches							
+ -+	Site area = $466.0 \text{ m}^2 (0.0466 \text{ ha})$ Pre-developed impervious area = 237.0 m^2 Post-developed impervious area = 277.0 m^2 Increase in impervious = $40.0 \text{ m}^2 < 50.0 \text{ m}^2$							
	to a one increase	Existing single dwelling where development is limited to a one-off alteration and addition resulting in a net increase in impervious area of less than 50.0m ² . Therefore OSD is not required.						
	No existing easement for stormwater drainage is present on the site and the installation of an easement through the rear property has been refused.							
	Exposed rock is present on the site and as such infiltration or absorption is not feasible.							
-+ +	Due to the low lying site it is necessary to partially charge the downpipes to the boundary pit P1 prior to the site being discharged from the boundary to the street via gravity as required. All charged lines shall be solvent sealed UPVC to gutter level throughout.							
ANDAH -+	DRAINAGE LINE NOTE: All underground pipes and pits shall not disturb tree roots. All sub-soil drainage shall be installed to BCA requirements and connected to the drainage system. Drainage line location is indicative and shown for clarity. Exact location subject to change to engineer's approval. Existing drainage infrastructure shall be clean & in proper working order. All levels shall be verified by builder on-site prior to commencing. All charged drainage lines shall be solvent jointed UPVC pipes.							
	DOWNPIPE & GUTTER SCHEDULE							
	MARK	GUTTER SIZE	DP					
	GS1	Stramit M/S Pattern Eaves Gutter	Ø90					
	NOTE: All Gutter Systems shall be GS1, UNO.							

STORMWATER PIT SCHEDULE							
PIT	PIT DIMENSIONS	PIPE I.L.		TOP PIT			
		IN	OUT	R.L.			
P1	450 SQ. Sealed Silt Pit	-	-	74.20			
P2	300 SQ. Clean-out Pit	-	-	-			

All pits greater than 1200 mm deep shall have step irons. Maximum pit depths: 450 x 450 - 600 mm max. 600 x 600 - 900 mm max. 600 x 900 - 1200 mm max. 900 x 900 - greater than 1200 mm

ICLE ACCESS TO SITE (ehicle access to the building site shall be restricted to a ingle point so as to reduce the amount of soil deposited on he street pavement. Berm min.
