RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

I object to the vertical seawall proposed at Collaroy/Narrabeen.

This development does not satisfy any of the considerations of SEPP (Coastal Management) in particular those of a coastal environment area or a coastal use area.

This stretch of coastline is an area of world class surf that attracts visitors and locals which contribute to the local economy. The seawall will alter long shore sand movements and affect the establishment of sandbanks within the entire bay that extends from North Narrabeen to Collaroy. This will jeopardise sand banks and potentially irreversibly change the surf zone for surfers and other beach users. Access during times where it is directly exposed to wave attack will be impeded and dangerous. The visual impact will be immense and adverse. This seawall goes against all sound planning and environmental principles and should not be approved.
