**RE: REV2022/0024 - 394 Barrenjoey Road NEWPORT NSW 2106**

With the growing demands on Surf Life Saving operations it is essential to have the facilities available and fit for purpose. I fully support the development application and believe it should be approved in it's current format. This will enable Newport to provide services into the future and meet the future demands of the community, including beach surveillance, emergency operations, training and educations as well as protecting the heritage listed building into the future.
