Subject: Mod2021/0047

To The Members of Northern Beaches Council

We email you regarding the following **Mod2021/0047**

In response to the so called noise created while attending to our market stall and the parking congestion created .Well we beg to differ and respect the fact that we are in a residential area. We bring to the community a point of difference by offering healthier options in the form of our apparel. All our products are unbleached and undyed and we are here to tell our story and by not being at these markets we will not be able to convey our message to stop supporting fast fashion, landfill and toxic chemicals. We've worked very closely with the Organic Market Teams during the C-19 pandemic with little or no fuss. We truly believe that our unique products and the like minded community appreciate us attending the weekly markets and will hurt my team of sustainable warriors that have an invested interest In attending these markets and serving the community. We ask that you reconsidered and assess the facts presented to you before make a decision that will affect many and I'm sure there is away we can resolve this like amicably.

Your sincerely
Carl Ludwig
