RE: DA2020/1027 - 0 Stuart Street MANLY NSW 2095

1. Why no rooftop solar panels? Since it is a daylight hours operation, it would be perfectly matched with solar energy.
2. Why has it taken over 10 months for a relatively small DA to be submitted? We have suffered through inadequate seating, operation in poor weather never guaranteed and minimal food offering. This development surely should have taken place before the warm weather arrived and the clientele increased.
3. I would like to be reassured that I can sit inside in cold or rainy weather to drink my coffee (necessary in the winter months)
