

## Natural Environment Referral Response - Biodiversity

<b>Application Number:</b>	DA2022/1155
<b>Date:</b>	22/08/2022
<b>Responsible Officer</b>	Michael French
<b>Land to be developed (Address):</b>	Lot 102 DP 803977 , 167 Riverview Road AVALON BEACH NSW 2107

### Reasons for referral

This application seeks consent development on land, or within 40m of land, containing:

- All Development Applications on
- Actual or potential threatened species, populations, ecological communities, or their habitats;
- Wildlife corridors;
- Vegetation query stipulating that a Flora and Fauna Assessment is required;
- Vegetation query - X type located in both A & C Wards;

And as such, Council's Natural Environment Unit officers are required to consider the likely potential environmental impacts.

### Officer comments

The proposal has been assessed against the following terrestrial biodiversity-related provisions:

- NSW Biodiversity Conservation Act 2016
- NSW Biodiversity Conservation Regulation 2017
- SEPP (Resilience and Hazards) Coastal Environment Area
- Pittwater LEP Clause 7.6 Biodiversity Protection
- Pittwater DCP Cause B4.7 Pittwater Spotted Gum Forest Endangered Ecological Community

The site contains Pittwater Spotted Gum Forest Endangered Ecological Community (EEC) and consequently, portions of the site are identified on the Department of Planning, Industry and Environment's Biodiversity Values Map (BV Map). Under the NSW Biodiversity Conservation Act and Regulation, any removal of native vegetation from within mapped areas will trigger the Biodiversity Offset Scheme (BOS) and the requirement for a Biodiversity Development Assessment Report (BDAR).

The submitted plans and documentation (including the arboricultural impact assessment) indicate that the proposed works will not require impact to native trees, including those identified on the BV Map. Conditions are recommended to avoid construction impacts to protected terrestrial vegetation.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

### Recommended Natural Environment Conditions:

## CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

### **Wildlife Protection**

If construction activity associated with this development results in injury or displacement of a native mammal, bird, reptile or amphibian, a registered wildlife rescue and rehabilitation organisation must be contacted for advice.

Reason: To protect native wildlife.

### **Protection of Habitat Features**

All natural landscape features, including any rock outcrops, native vegetation and/or watercourses, are to remain undisturbed during the construction works, except where affected by necessary works detailed on approved plans.

Reason: To protect wildlife habitat.

## CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE OCCUPATION CERTIFICATE

### **Protection of Habitat Features**

All natural landscape features, including any rock outcrops, native vegetation and/or watercourses, are to remain undisturbed except where affected by necessary works detailed on approved plans.

Details demonstrating compliance are to be provided to the Principal Certifying Authority prior to issue of any Occupation Certificate.

Reason: To protect wildlife habitat.

### **No Weeds Imported On To The Site**

No Priority or environmental weeds (as specified in the Northern Beaches Local Weed Management Plan 2019 – 2023) are to be imported on to the site prior to or during construction works.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to issue of any Occupation Certificate.

Reason: To reduce the risk of site works contributing to spread of Priority and environmental weeds.
