RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085

We are very concerned with the amount of increased traffic that will occur if this development goes ahead. At present that corner is very busy, a bus route, now a very large Shopping Complex, the Glen St Theatre Complex and the Service Station (which is the only location one). In addition the corner is full of school children in both the morning and afternoon going to Davidson and Mimosa Schools. It's bad enough for them trying to see all the traffic coming from 3 different directions, this will make it even more difficult. We need more green space to balance the already vast amount of concrete not a big housing block in an area of low density properties. There is too much there already this will only make it worse, and as I said before more dangerous for many of the youngsters that use it.
