RE: DA2023/0597 - 14 / 22 Central Avenue MANLY NSW 2095

I am thrilled by the prospect of welcoming these remarkable businesses to Manly. Given the significant impact they can have on the local economy and community, I strongly recommend that the council's planning department expedites the approval process. A timely approval would enable these businesses to open their doors in September, providing them with the best opportunity for a successful launch coinciding with the arrival of spring.

By facilitating a swift approval process, the council can actively support these businesses in capitalizing on the favourable market conditions during the vibrant spring season. This would create a favourable environment for their initial growth and ensure a strong kickstart for their operations. Not only would this benefit the individual businesses, but it would also contribute to the overall economic vitality of Manly.

I urge the council's planning department to recognize the importance of timely approvals in fostering a thriving business landscape and seize the opportunity to assist these new enterprises in their quest to establish themselves in Manly. By doing so, we can collectively work towards maximizing the potential benefits and setting the stage for a prosperous future for both the businesses and the community as a whole.

Thanks
Edward Breslin
