**RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101**

Please consider the environmental impacts of this sea wall, and the current research that supports that it will have a devastating and detrimental impact. The beach should be protected from erosion, and this wall is being built to protect property owned by individuals. Collaroy Narrabeen beach is a beautiful, natural feature for the whole community to enjoy, and this concrete wall overwhelmingly impedes the visual aspect of the beach. It provides a stark and confronting contrast between nature and a man made construct. It's actually quite shocking to walk along the beach next to this (we live across the road). We urgently request that the wall is removed, and a functional and environmentally friendly sea wall is developed in lieu of this monstrosity. Thank you.
