RE: DA2023/0669 - 16 Macpherson Street WARRIEWOOD NSW 2102

My concerns are

1. Loss of habitat when large trees are removed for this development. There are so many birds that roost in the trees, plus other species of wild life.
2. The area is low lying & we have regular major flooding on Macpherson Street. I note even days after rain the nursery has to pump water away.
3. Macpherson Street is already a busy access road to Mona Vale Road. How will this be dealt with?
