RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

This proposal will likely result in an visually unappealing structure right in the middle of a location which is currently used by local families and residents. It is highly likely that other carriers will subsequently also erect equipment on the pole and surrounding area, further detracting from the aesthetic of the lagoon/reserve area. In addition to the visual impact there are potential health and safety issues given proximity to the local school and sporting facilities used by so many young families.
