RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

The development of the shopping centre will increase traffic within the area and without proper measures of access from the main roads the back street traffic volumes around the area will increase substantially. Together with the northern beaches hospital increase of traffic, this will result in a high increase in traffic flow to the back streets causing congestion and unsafe conditions for the families and schools in the area. We need appropriate traffic studies completed of the traffic changes to accommodate this development, not only for the main roads but also the back streets.
