RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096

I strongly oppose the extension of sporting hours and upgrade to lighting on John Fisher and Weldon ovals.

I regularly visit the area to visit friends that live on Manuela Place and I think its outrageous that this proposal is even a consideration. I've often commented on the tranquility of the are and how special it is to have open areas of green space for community to use. It's lovely to see children of all ages playing with their friends and family- including ours. Having open areas that can be shared by all- not just for the sports, is so important for community and mental health.

There are many houses that back right onto the oval that would surely be directly effected by the significant increase in light and noise pollution?

These are public/community spaces that should be enjoyed by all the community not just the sporty children. And certainly not at the expense of rate payers.

I strongly oppose the proposal.
