- 3.07 Contractual Responsibility
- 3.08 Site Restrictions
- 3.09 Deviations

## ONGOING MANAGEMENT

### 4.0 Management Statement

#### 5.0 Statement of Responsibilities

- 5.01 Building Management
- 5.02 Caretaker
- 5.03 Tenants
- 5.04 Sub-contractors
- 5.05 Waste Collection Agency

#### 6.0 Waste Management Procedure

- 6.01 Garbage Rooms and Bin Supplier
- 6.02 Garbage & Recycling Bins
- 6.03 Access
- 6.04 Collection
- 6.05 Contractual Responsibility

# INTRODUCTION

The Applicant recognises the need to protect the environment and the advantages that can be achieved by considering ways of waste reduction, recycling and a corresponding reduction in landfill during the planning stage of this project.

Particular waste management guidelines and/or procedures will be proposed for:

Onsite; during the excavation and construction phases

Ongoing; for the residential life of the project

The main objective of this plan is to reduce the amount of waste to be disposed of at landfill. Consideration has been given to the volumes and type of wastes to be generated (whether onsite or during occupancy) and provisions for waste facilities for storage and sorting for the possibility for reuse and or collection.

The ability to plan waste management may be restrictive under some circumstances due to storage capacity, nature of the waste and or its ability to be recycled or economic collection. However, it is envisaged that project goals can be achieved by co-operation of all parties associated with the project, for all those involved in the physical making of it as well as its future inhabitants.

# ONSITE WASTE MANAGEMENT

## **1.0 Management Statement**

More detailed waste management plans will be prepared, in coordination with the builders, for future Construction Certificates.

The builder will instigate a plan for onsite waste management for this project with the guidelines as described hereafter.

## **2.0 Statement of Responsibilities**

Detailed below are the responsibilities of the assigned participants who will be encompassed in the waste management plan for this project:

### **2.01 Demolition Contractor**

All demolition work is to be carried out according to AS 2601-2001-Demolition of Structures and OH&S requirements. Where possible, demolition waste is to be sorted for reuse and recycling, all other waste shall be to be taken to appropriate waste management centers and/or landfill sites.

### **2.02 Project Planners**

The project planners are those who foresee the need to instigate waste management on the project and are responsible for financial implications that may benefit or otherwise the project viability.

### **2.03 Project Manager**

The project manager will instigate the waste management plan and will ensure all site personnel, material suppliers and subcontractors are aware of the project goals and are committed to those goals.

### **2.04 Site Supervisor**

The site supervisor is responsible for the on site management of waste control, collection and sorting of specific recyclable materials and of other waste, the site supervisor will enforce the waste management procedure.

### **2.05 Subcontractors**

All subcontractors will be required to comply with waste control, collection and sorting be instigated on the project. Specific material that may not be collected on site will be removed from site by the subcontractor responsible for its generation and where possible recycled.

### **2.06 Material Suppliers**

Material suppliers will be instructed to restrict packaging to reduce excessive packaging and the extent of waste delivered to site.

### **2.07 Waste Collection Agency**

Waste collection agencies are responsible for provision of appropriate collection bins, signage of specific collection bins, removal and transport of the specific waste to the point of recycling or to the appropriate disposal area.

### **2.08 Recycling Agencies**

Recycling agencies are those organizations that are able to receive specifically sorted waste and recycle that material into new products.

### **3.0 Waste Management Procedure**

#### **3.01 Bin Supplier**

The waste management plan for 27 Redman Rd, Dee Why will call upon waste collection agencies to provide collection bins for the accumulation of sorted select waste materials and the removal and transportation of those bins to recycling agencies.

#### **3.02 Garbage & Recycling Bins**

Sufficient areas will be provided for waste storage, sorting wastes and recyclables. Bins will be adequately sign posted as to the specific material to be deposited in each bin. All such areas will be located on ground level for easy access.

Individual bins shall be provided for the following materials on an as need basis, the following are suggested:

- Light Loads Category 1 - for light building materials such as timber, gyprok, plasterboard, plastics, metals, etc and domestic rubbish.
- Heavy Loads Category 2 - for heavy building materials/demolition materials, including bricks, tiles, concrete, soil etc.
- Bricks, Concrete and Tiles - for any combination of the above with the inclusion of no other rubbish.

All recyclable material from the above will be sorted, sieved and recycled at the bin/skip provider's premises.

#### **3.03 Access**

All bins will be located on ground level for easy access and collection from Redman Rd. Allocated areas may change during the process of demolition and construction, depending on the availability of space and locality of works.

Site access will be controlled ideally at one point and separate areas will be designated for delivery drop off and collection point, all to be clearly marked onsite and from the street.

#### **3.04 Collection**

Waste collection vehicles will access the garbage area to collect bins on a need basis; this will vary during the demolition and construction stages.

#### **3.05 Excessive Packaging**

The subcontractor or material supplier shall restrict packaging to the minimum necessary to protect the article from damage during transport and installation. Excessive packaging shall be removed from the site by the material supplier or the subcontractor. The method of disposal shall be confirmed with the Site Supervisor prior to removal.

#### **3.06 Surplus Soils/Rock and Spoil**

Surplus soil/rock and spoil shall be directed from landfills wherever possible. Method of disposal shall be confirmed with the Site Supervisor prior to removal.

3.07 Contractual Responsibility

Consistent with the objectives of the waste management plan, all contracts involved in the demolition and construction phase is suggested to have a waste management clause that will enable common project goals to be achieved.

All site personnel shall be responsible to deposit the appropriate material in the allocated bin. Incorrectly deposited material shall be sorted by the party responsible.

3.08 Site Restrictions

The Builder will endeavor to ensure that the efficient management of access is carried out. Waste management practice must be upheld.

3.09 Deviations

Any deviations from the proposed waste management plan shall be submitted to the Site Supervisor for approval. Such deviations must be assessed against the main objectives of the plan.

# ONGOING WASTE MANAGEMENT

## **4.0 Management Statement**

Provisions for waste facilities have been allocated throughout the project to assist the management of wastes generated on the subject site during its occupational life.

Building management will instigate a plan for ongoing waste management for this project with the guidelines as described hereafter.

## **5.0 Statement of Responsibilities**

Detailed below are the responsibilities of the participants who will be encompassed in the waste management plan for this project:

### **5.01 Building Management**

Building management will be responsible for providing and maintaining the ongoing waste management facilities and services at the subject site.

Building management will instigate the waste management plan and will ensure all participants are aware of the project goals, committed to those goals and know their contributing roles of the plan.

### **5.02 Caretaker**

Building management will assign caretakers to handle wastes in accordance with Council's waste collection service for the proposed development.

Duties include, but are not limited to the following:

- General maintenance, organising and cleaning of the chute doors and recycling holding area on each residential level.
- General maintenance, organising and cleaning of general and recycled waste holding area
- Organising both garbage and recycled waste pick-ups as required and transporting of bins to and from the collection area
- Cleaning and exchanging all bins
- General education and provide information to all residents and tenants on appropriate methods on sorting general and recyclable waste and ensure all drop-off points are accessible to all residents and tenants at all times of building operation. This may include notices and signage.

Building management's responsibility also includes monitoring the number of bins required and the frequency of general maintenance and cleaning which is determined on waste generation once the building is in operation. Number of bins, size and operation may be altered to suit building operation should waste volume and approach to waste disposal and recycling change.

### **5.03 Waste Collection Agency**

The waste collection agency is responsible for provision of appropriate collection bins and typical weekly collection services; this is proposed to be Council.

All green waste will be collected and removed from site by the maintenance contractor.

## **6.0 Waste Management Procedure**

Waste and recycling areas as well as collection arrangements have been provided for residential activities in accordance with Council's objectives.

### **6.01 Garbage Room and Bin Supplier**

The garbage rooms are located at the base of the chute (ie, one per each lift core), which is to have a bin carousel and compaction capability. Garbage room is located on ground floor. The garbage room is sized to hold sufficient general waste and recycling bins to service the development and will be ventilated and be kept clean at all times. Taps for cleaning and floor waste to comply with Sydney Water requirements are to be provided.

Security access key will be provided for building management or caretaker.

A bin holding/collection area is to be located in the driveway area accessed from Gondola Rd, and will be kept clean at all times, taps for cleaning and floor waste to comply with Sydney Water's requirements will be provided. .

Bins will be transferred to the collection area prior to scheduled collections, and then returned to each garbage room afterwards.

Council will provide bins for all general waste, recycling and green waste.

### **6.02 Garbage & Recycling Bins**

Prominent signage will be provided within all designated waste handling areas, indicating correct use of bins and chutes.

Waste cupboards could be provided as part of the fit out of each dwelling for the convenience of residential tenants, typically in the kitchen. Waste cupboards will be capable of holding a single day's waste and allow for separation of waste. Residents will transport their unit waste to the garbage chutes located in the lift lobby area at each level.

Garbage bins will be stored in the garbage rooms/areas located on ground floor and a Garbage compactor facilities will be provided. The compactor units shall be set at a 2:1 ratio.

Recycling bins are to be stored in garbage chute rooms on each residential level, and transferred to the basement one garbage by the building's caretaker for collection/transfer to bin collection areas.

The Northern beaches DCP 2014, requires the provision of 240-litre bins for waste and recycling to be provided at the following rates:

	Residential
Garbage	240 units/week
Recycling	240 units/week
Green waste	N/A

For the proposed 4 residential units and retail tenancy, provisions to accommodate the following have been allowed for:

Table 1 - Residential waste generation				
	Rate (L/unit)	L required		provided
Garbage	80/week	4x80 = 320L		2 x 240L bins
Recycling	140 /week	4x140 = 560L		3 x 240L bins
Green	-	-		-

The building manager of the proposed development may wish to revisit these provisions from time to time to ensure sufficient waste bins are provided for all future tenants.

#### 6.03 Access

A garbage and recycling holding room is proposed for the residential units in Ground level. Security access key will be provided for care takers access via security controlled door.

#### 6.04 Collection

The Northern beaches waste collection service will collect all general residential waste on a weekly basis, and recyclables on a fortnightly basis. The collection point will be from the designated "Bin Holding Area" accessed from Redman Rd. Please refer to Traffic Report provided by Terraflow

#### 6.05 Contractual Responsibility

Consistent with all the objectives and commitments of building management, a waste management clause may be included in tenancy agreements to enable common project goals to be achieved. Any mishandling of bins will be punished by building management.
