RE: DA2023/0718 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Golf at Bayview GC has been a life saver for me since retirement for sport activity & perhaps more importantly social interactivity.

I'm reasonably involved playing 3 times a week and also play in the senior interclub challenge against 5 other clubs in the northern beaches. I also volunteer in working around the course mainly gardening, weeding and keeping our drains clear.

I see it as important to maintain the course so we can keep playing challenging golf and that ALSO means improving the course. This includes replacing the tee boxes and greens when the grass & subsoil-drainage has passed it used by date.

Bayview is an important green space as well as an activity area which falls in the aims of any council to support. Unmaintained areas including some creek cleaning I've done would mean that I would not see as I did last week a grey heron catching a fish well up the creek from Pittwater. we all stopped playing golf to watch this.

The golf course with the gardening, weeding and cleaning up the cabbage tree leaves that fall certainly must be seen as maintaining the fauna in our [the community] green space. It also stops water erosion, an enemy of the course and its surrounding creeks.

I urge you to support this DA.
