S4.55 Application for a Minor Alteration to the Approved Design

DESIGN VERIFICATION CERTIFICATE

I am the architect and designer of the existing house and its approved upper level two room extension.

The minor modification is the provision of an additional window 600 mm wide and 1400 mm high to the approved West Elevation. The window is identical in size and manufacture to two other casement windows already granted approval for this project.

The new window is designed to complement the existing character of the house.
