RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

Building the wall is proven worldwide not to be the solution, it will permanently damage the beach and impact the lives of the whole community. If only all this time and money were invested in regenerating the native vegetation that actually hold the sand and avoid erosion to grow every year, we could see a real and reasonable solution for the issue. Erosion happens all around the world and causes disastrous events, all by the same cause, deforestation, so as simple as it sounds, take an action that actually works, a sustainable one.
