Good afternoon,

Hope you are well. My name is Daniel Yamashiro from 1/20 Angle street

I have an OBJECTION about this development and do not support it in any way as it will disrupt my home office, trees already block the sun to my window, I am afraid this construction will make matter worst by blocking the very few sky I can see. Never mind the pollution and noise of a big construction project like this one.

I already have a big big issue with the area closest to where the construction will take place as it floods, worst of all, my garage and storage room underneath also floods and is in constant dump state ruining my belongings. I believe water coming from 22 Angle street is a big contributor of this problem. I have been struggling with strata management and their lack of care the last 10 years we have owned this apartment.

Please help

cheers
