**RE: Mod2020/0343 - 78 Hudson Parade CLAREVILLE NSW 2107**

With reference to the new construction at 78 Hudson Parade Clareville i have witness and spoken to several locals who cannot understand how and why the new development is allowing a seawall to be erected along the foreshore so that we can no longer walk past once tide is approaching the high tide level. This will mean that twice a day for 4 hours each time we can no longer pass this one section of the beach without getting wet shoes! Further more there is public access via walkways to the North of the development as well as the south.

We walk this way several times a week and have been doing so for over 20 years.

What can we do to stop this section of the development? The plans online are in a 1:350 scale and lack any real detail??? Need some hasty answers please or we will start a petition. This is not acceptable.

We need a detailed plan that shows the access at high, mid and low tide for this property. This needs to be made public immediately please.
