**Re: PROPOSED CARPORT AND INCLINATOR
LOT 2 DP 1104192 / 60 – 62 CHISHOLM AVENUE, AVALON BEACH NSW
BUSHFIRE ASSESSMENT STATEMENT**

Dear Andy,

We thank you for engaging us to undertake this assessment for you.

It is of our understanding that the proposed development application relates to the construction of a new carport and inclinor within an existing allotment known as 60 - 62 Chisholm Avenue, Avalon Beach (Lot 2 DP 1104192).

The purpose of this statement is to ascertain compliance or otherwise with Australian Standard 3959 - 2018 'Construction of buildings in bushfire-prone areas' and 'Planning for Bush Fire Protection' 2019. This type of development is considered infill and assessed under section 4.14 of the Environmental Planning and Assessment Act 1979.

Properties considered to be affected by possible bushfire impact are determined from local Bushfire Prone Land Map's as prepared by Council and or the Rural Fire Service. All property development within affected areas is subject to the relevant specifications and requirements detailed in the document 'Planning for Bush Fire Protection - 2019' (PBP).

Set back distances for the purpose of creating an Asset Protection Zones (APZ) and / or determining separation distance from a hazard interface must be assessed and any buildings must then conform to corresponding regulations detailed in Australian Standard 3959 – 2018 'Construction of buildings in bushfire prone areas' (where applicable).

The most appropriate method of determining the site bushfire hazard under the terms of PBP is to consider the site in a singular form.

Bushfire prone areas are defined as those areas;

- *containing or within 100m of Category 1 Vegetation; or*
- *containing or within 30m of Category 2 or 3 Vegetation.*

Northern Beaches Council's Bushfire Prone Land Map identifies the subject property as partially containing the 100 metre buffer zone from Category 1 Vegetation therefore the application of Planning for Bush Fire Protection - 2019 (PBP) must apply in this instance.

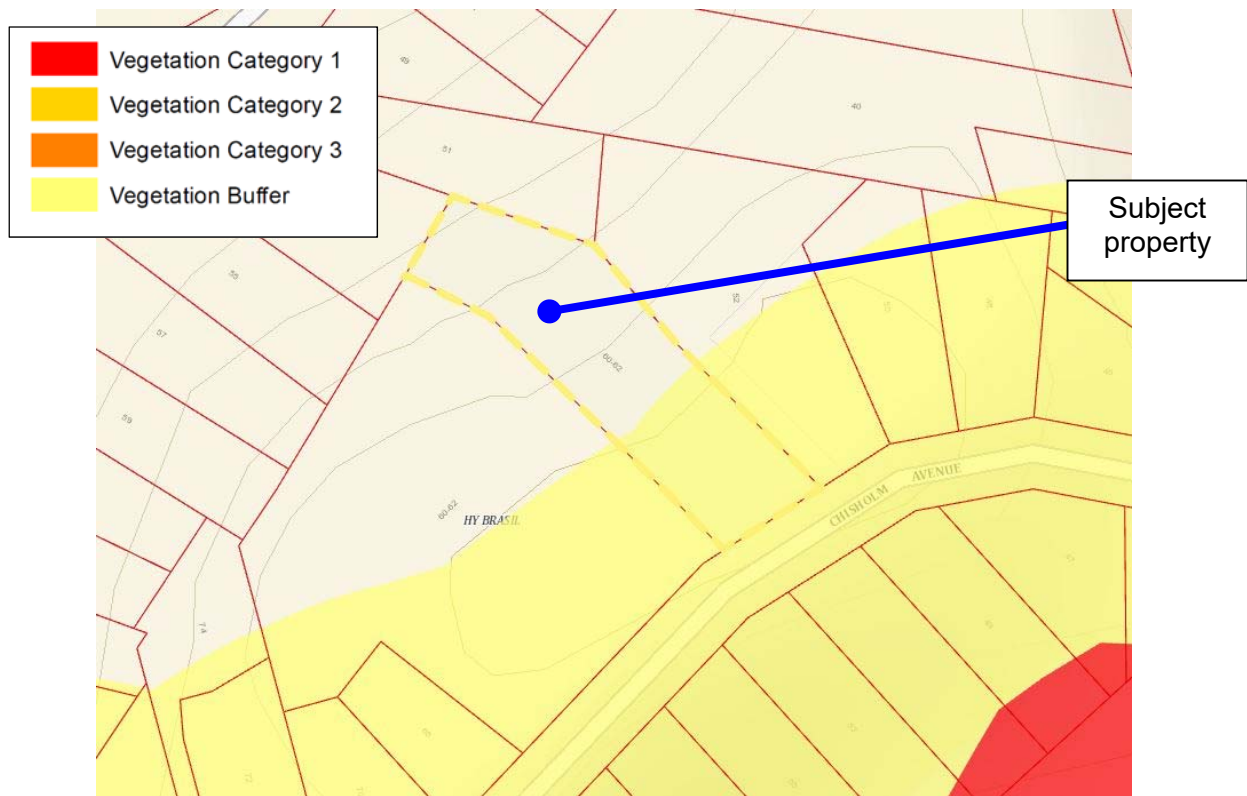

Image 01: Extract from Northern Beaches Council's Bushfire Prone Land Map

Image 02: Aerial view of the subject area c/- Nearmap – January 2021

The proposed development relates to the construction of a new carport and inclinator within an existing residential allotment.

In relation to the proposed new carport and inclinator section 8.3.2 of PBP states:

The NCC defines a Class 10 building as a non-habitable building or structure such as a:

- a. Class 10a – a non-habitable building being a private garage, carport, shed or the like; or*
- b. Class 10b – a structure being a fence, mast, antenna, retaining or free-standing wall, swimming pool, or the like; or*
- c. Class 10c – a private bush fire shelter*

There is no bush fire protection requirements for Class 10a buildings located more than 6m from a dwelling in bush fire prone areas. Where a Class 10a building is located within 6m of a dwelling it must be constructed in accordance with the NCC.

The proposed carport will be located greater than 6 metres from any dwelling.

It is therefore of our opinion the proposed carport satisfies the requirements of PBP 2019 and AS3959 by means of the above and no additional provisions are applicable to the proposal.

The proposed inclinator will be constructed entirely out of non-combustible materials which is also considered acceptable.

In consideration of the site specific bushfire risk assessment it is my opinion that there is a reasonable level of bushfire protection to the subject development.

We are therefore in support of the proposal. Should you have any enquiries regarding this project please contact me at our office.
