**RE: DA2019/0200 - 130 Old Pittwater Road BROOKVALE NSW 2100**

I am very disturbed to read of the intended demolition of bushland at Brookvale currently a reserve. It forms a wildlife corridor linking Allenby Reserve to Manly Dam, used by swamp wallabies and the bushland is wildlife habitat for Powerful Owls, and many other species of wildlife.

This is another example of the ongoing encroachment of wildlife habitat and native bushland.

As a wildlife rehabilitator I am finding the continual loss of wildlife habitat with animals being displaced and being killed on roads and attacked by domestic cats and dogs.

We must protect the small amounts of the natural environment and keep our wildlife within their habitat.
