Dear Sir/Madam

Modification Application for Development consent DA96/371 Re-configuration of the approved Clean Water Diversion System

Thank you for consulting with the NSW Environment Protection Authority (EPA) on the modification application for development consent DA96/371 - Re-configuration of the approved clean water diversion system at the Kimbriki Resource Recovery Centre.

The EPA understands that the proposed design amendments primarily relate to a revised channel arrangement to the eastern and western diversion drains consisting of a combination drain/access track with a low flow spoon design that does not include a deep channel section with a grated cover.

The EPA considers that the proposed modifications to the water diversion system will have little impact on the proponent's ability to meet its statutory obligations and best practice environmental objectives in accordance with the relevant EPA policies, recommendations and commitments described in the assessments and/or studies prepared in accordance with the project approval.

The EPA has no further comments to provide in relation to the application.

Yours sincerely
