RE: DA2019/0200 - 130 Old Pittwater Road BROOKVALE NSW 2100

There has already been far too much natural green corridor destroyed in the area by development. This development will remove even more and in doing so remove much needed habitat for native birds and animals that live in the area. This causes more death on roads of animals with no safe area to live or move about.

It's far more important to maintain some of our natural bushland in the area than build on it for profit.
