Dear Panel,

Further to my objection to the above modifications, I would like to raise another issue.

Of the submissions that are for support of a restaurant for evening dining, can they be included as also supporting the venue being a function centre in the proposed extended hours?

I would expect their support would have to be revisited and confirmed - that they approve of this facility being unavailable for the community due to functions?

I suggest you may find a different number of supporters in your additions to those concluded in your report.

Please consider this.

With kind regards,

Sally Constable
