Subject: TRIMMED: DA2024/1216 - Submission of Support

Dear Council,

I am writing to express my support for Development Application DA2024/1216, which seeks to enhance the safety and functionality of the bay through key improvements.

The proposed removal of 10 swing moorings and the creation of a 50m-wide safe navigation channel will significantly improve water safety, particularly for small and passive watercraft such as kayaks, dinghies, and stand-up paddleboards. Additionally, the reconfiguration of the existing marina to accommodate 9 new berths is a thoughtful approach that avoids further encroachment into the bay.

The inclusion of modern dinghy and kayak storage racks in place of the outdated slipway is another positive aspect, aligning with contemporary environmental standards. Furthermore, the proposed kiosk's limited operating hours (7am – 4pm), 20-patron cap, and restriction on alcohol sales ensure minimal impact on the surrounding community.

This proposal balances improved water access and safety while maintaining the environmental and community character of the area. I fully support the application and encourage Council's approval.

Kind regards,

Renuma Pasha
