Subject: Submission on Proposed Development Mod2022/0460 - DA2020/0014

To whom it may concern,

Window 17 and 18a had fixed privacy screens in the original approved submission, external blinds do not provide for continuous privacy maintenance.

Window 18a/b now proposed to be fixed, previously this was a balcony. With the window fixed this is now no longer a balcony but is a cantilevered room, as such is the building now extending forward of the foreshore setback requirement?
