Dear Brad,

RE: FCBP9 - 4.55 Letter, Substation location & Access Arrangements

JOB NO.: 210066

As the ASP3 designers for Project Maui Oncology, we confirm the following:

- To meet Ausgrid's access requirements, Project Maui's Ausgrid design AN-22489 utilises a pathway around the building
- This access pathway requires landscape changes subject to the this S4.55 application
- This pathway was required as the site did not have any other access options which met Ausgrid's Network Standards without significantly modifying the building.

Should anyone have any questions or issues with the above, please do not hesitate to contact the undersigned.

Yours sincerely,

Brenton Burrows

Director
