TREES: All trees to be staked: use 2 x hardwood 50x50mm stakes and hessian webbing. See detail.

TURF:

1. Install turf rolls diagonal to the fall of the land. Roll turf following installation, and water as required. Use soft leaf Buffalo sp.

2. 50 - 70mm topsoil underlay to be used in ground preparation. Note: check ph after construction and before laying turf, adjust as required for optimum plant growth.

SOIL:

1. Contractor is to check soil pH levels two weeks prior to planting, and allow for reasonable adjustments, using lime or similar to ensure plant viability.

2. Break up existing ground surface using mattock, rotary hoe or tractor tine as required.

3. Topsoil sandy loam 50mm depth to turf areas.

4. Where necessary mound soil to assist in soil drainage to avoid root rot and poor plant growth.

5. Incorporate ¼ tonne organic soil mix into holes where trees are planted, using recycled leaf litter as mulch.

6. Soil quality to be Australian Native Landscape Standard.

7. Supply and install 'Garden Mix' to all garden beds incorporated into the top 300mm of existing site profile. Note: use rotary hoe as required. Do not just place on top of ground.

MULCH: Mulch to be installed to all planter beds to a depth of 75mm. Mulch type to be Recycled Leaf Litter ideally from local tree company based on more native plants than general exotics.

EDGING: See plan for locations. Top edge higher than lawn to allow garden beds to be aerated and mounded.

LIGHTING: Future plans TBA
