RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

Before the development is allowed to go ahead, we request that the RMS and Transport for NSW and the Developers agree a suitable entry exit point that takes traffic on and off the main arterial routes (Forest Way and Warringah Road) and NOT the local back streets.

As a resident of Deakin St, we witness daily the problems associated with the high traffic flow in the back streets (including Deakin and Bentley St) - damage to parked vehicles is frequent and within the last six months in front of our house alone, has included scraped cars, wing mirrors knocked off multiple cars and an SUV written off. We feel unsafe parking in our suburban street. At peak times, drivers become impatient navigating the narrow streets as only one car can pass when residents and visitors need to park on the road.

We kindly request your careful consideration as these streets are already heaving and problematic. We request direct exit from any redevelopment onto Forestway and/or traffic lights at the intersection of Altona and Warringah Road.
