Subject: Gymnastics Centre of Excellence Proposal

Dear Council,

Regarding the application DA2023/1708

In the past few years, this club has offered so much to a lot of people in the community (people that work there as coaches, parents, kids).

The club offers many different programs and disciplines for young kids and adults, promotes development of sport and recreational activity, creates athletes able to achieve international results, and especially gives opportunities to passionate coaches to become high performance experts.

I think the idea of a new facility is great.

This new centre of excellence can give an extra help to the community, providing all new different opportunities for everyone.

I strongly support this proposal and I hope this dream will become true.

Thank you

Regards

Riccardo Maturo
