FLORA AND FAUNA ASSESSMENT REPORT

Properties: 1172-1182 Pittwater Road, Narrabeen, NSW 2101

The subject properties, where coastal protection works are proposed, were inspected on 2 May 2017.

There is no evidence, within the confines of the properties and the proposed works, of any threatened or endangered NSW coastal species listed in the *EPBC Act 1999*, or Threatened Species and Ecological communities listed in the *Threatened Species Conservation Act 1995*, including those which would be capable of surviving in sand and the poor quality soil at the subject properties.
