**Subject:** FW: DA 2020/1063 - Proposed Floodlights on Frank Gray & Mike Pawley Ovals

Attention: Ray Brownlee

CEO - Northern Beaches Council

**Re: DA 2020/1063 - Proposed Floodlights on Frank Gray & Mike Pawley Ovals**

The abovementioned Proposal aims to allow extra night-time training for several sporting codes. This necessitates the installation of Floodlights.

**The Problem**

The major issue with this current proposal is the actual location, whereby the Floodlights will be metres away from an adjacent quite family neighbourhood, and obviously there will be major issues with - parking, traffic & noise.

**The Solution**

Freshwater Senior Campus Oval, which Council now controls and maintains. This Oval has a 90 space car park that easily accessed off Harbord Rd, is available every night.

The Freshwater School Principal, is 100% in support of this Oval being upgraded and Floodlight, and the local community have also endorsed is compromised solution.

We now look forward to Council modifying the current DA and seek approval for the new location.

Thanking you in advance for your support.

Best regards,

Curl Curl Residents Support Committee
