RE: REV2021/0045 - 5 Skyline Place FRENCHS FOREST NSW 2086

I'm against this horrible building they keep attempting to build, firstly the area is much too busy, the building getting done in the lot next door has had zero care for neighbouring residents from day 1 of demolition covering houses in dust and even debris from then on late night put of hours construction every week and weekends has given residents zero rest and no answer from site manager, many trees keep being taken out and the trucks are parking illegally causing havoc to traffic so once hundreds more residents move in it is only going to get worse, this development has already started to ruin the area and further mass development will only continue to damage the frenchs "forest" area, the council also don't monitor any of the put of hour works or the mess that is stewn up and down the streets, on top of that more people in the area is not ideal at all and the crime rate will also rise with it
