## RE: NORTHERN BEACHES COUNCIL 'DEEM TO SATISFY' RECOMMENDATION

To Whom It May Concern,

As the Landscape Architect responsible for reporting on the compliance of this project, we seek approval of smaller street streetrees as nimonated below, based on the lack of availibility.

The following nurseries were contacted 2 & 3<sup>rd</sup> of May 2018 for the supply of super-advanced plant stock in the 3 species nominated on the approved plans.

1. Angophra costata - Quantity 20
2. Waterhousea floribunda - Quantity 10
3. Syzgium Paniculatum Sub Resilience - Quantity 20:

Andrasens Wholesale Nursery  
Downs Wholesale Nursery  
Alpine Wholesale Nursery  
Flemmings Nursery  
Duralong Plant Nursery

None of the above mentioned nurseries were able to procure the stock in the size nominated. The closest match to size and quantity is as follows;

- |                                       |  |
|---------------------------------------|--|
| 1. Angophra costata                   | <b>100Ltr;</b> Quantity 20; Alpine Nursery           |
| 2. Waterhousea floribunda             | <b>200Ltr;</b> Quantity 10; Alpine Nursery           |
| 3. Syzgium Paniculatum Sub Resilience | <b>100 Ltr;</b> Quantity 20; Dooralong Native Plants |

In summary it is our recommendation to allow the contractor to supply in smaller size as listed above.

Yours sincerely,  
Conrad Grayson  
Registered Landscape Architect #1420
