Officer comments

The application is for modification to development consent DA2023/1869 as described in reports and as illustrated on plans. In terms of landscape setting outcomes, the modification includes: extension to the basement at the ground floor level of the building and this reduces the soil depth to the courtyards at first floor level. It is however noted that this courtyard level is designed under the development consent with predominately lawn areas and low height planting or planting not requiring substantial soil depth, thus the indicated soil depth on the modification plans are adequate to support the intended landscape outcomes.

Landscape Referral conditions under the development consent remain altered including: Conditions 10, 11, 38, 39, 43, 60, 61, and 88.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.
