RE: DA2019/1149 - 11 Moore Street CLONTARF NSW 2093

Hello, My Concern on this DA is the the height of building extension proposed. My understanding is houses are not to exceed 8.5 m from lowest natural ground level of existing building.

From what I can see on plans this second level exceeds this by over 1 m.

Obviously this is of great concern as this proposed second level directly affects our pre existing view line to middle harbour.

I have spoken to Stuart & Belinda Anderson last Saturday 2nd, & mentioned that a flat roof rather than design submitted would give them plenty of space without the added height over regulation.

I am available to talk with council or owners at any point.....041 6053472.
